

---

Dear Parents,

This past Saturday, our new home at 34 Winter St. was open to families interested in taking tours of the new space. The parents and students who stopped by enjoyed taking a peek at the new space and having a chance to envision their new school in the fall.

In the continuing efforts to ready 34 Winter St. for the 2017-2018 school year, the environmental company Enviro-Safe has completed a review of the building and grounds. Any needed remediation or abatement will be addressed during February break and at the outset of the renovations this summer.

On Monday (Martin Luther King Day), our contractor, sub-contractors, and engineers are conducting a detailed walk through of the building to confirm plans about renovation needs relating to the walls, flooring, lighting, electrical, and information technology infrastructure.

There is much to be done between now and September and we are pleased with the progress thus far.

Warmly,

Deanne
