

Dear Parents,

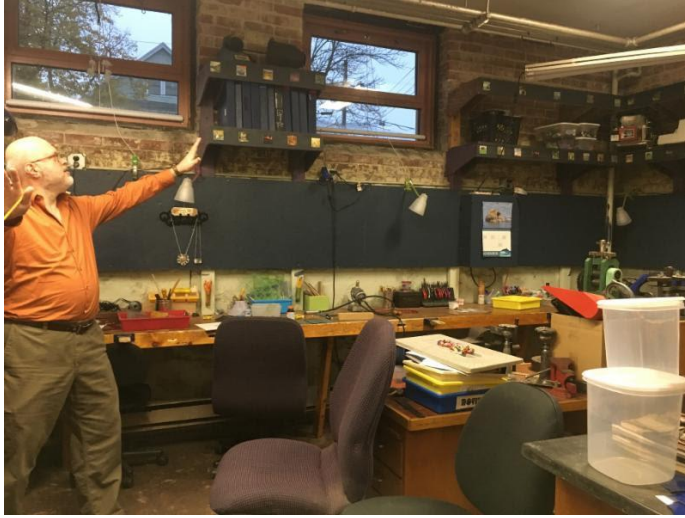

This week several faculty and staff members went to 34 Winter Street to take a look at various areas of the building as we continue planning for our upcoming move!

Bobby Smithney, our theater teacher, spent time in the gym as he plans how we will use that space for our various performing arts productions next year. One plan in the works is a portable stage which gives us flexibility to make the gym a multi-use space.

Science teacher Chuck Claus took a close look at the new science lab space as we begin to plan for both the location of the lab and the layout of the lab!

Dave Casanave, Director of Communications, and Liam Nolan, Kindergarten teacher and member of the marketing committee, spent time roaming the halls and classrooms, taking pictures and capturing the essence and feel of our new home.

We'll continue to share more news about the move to our new home at 34 Winter Street and more images of the facility in future updates!

Warmly,
Deanne
