

---

Dear Parents,

What is a floor? It's the area on which we stand in a room or on which we walk in a hallway. And as such, it provides us foundation, direction, and security. Floors ground us to our surroundings.

With this in mind, we are hard at work on our floor coverings at 34 Winter Street. We have been working with Kristen Lewis, an interior designer and parent of Cameron in TK, to pick out carpeting and determine styles and colors. A close cousin to floors are walls! They haven't escaped our design committee's eye! Paint samples and color palettes have been examined, and we think you'll love the color combinations in the classrooms and hallways.

A brief update on the status of the Lesley Ellis house. School's for Children (SFC), our parent organization, has been showing the house to potential buyers for the last couple of months and has recently signed a purchase and sale agreement. Happily, the house will continue to be available to the administrative team throughout the summer while we organize and coordinate the move to 34 Winter Street.

Although the school year is coming to a close, our facilities updates are not! We'll continue to share with you the progress on the move to our new home throughout the summer.

Warmly,

Deanne
